

## **A unique refugee integration project creating jobs and welfare.**

***ArbetsSkaparna (The Job Creators) help asylum seekers and refugees with residence permit to establish themselves in the Swedish working life. We do that by employing enterprising women and men in order to make it possible for them to market their services and products without having to start businesses of their own. In simple terms ArbetsSkaparna is a kind of staffing agency that takes full responsibility as an employer and our business idea is to help our job creators succeed.***

We are four entrepreneurs in Ekshärad in the north of the landscape of Värmland who started this integration project as we consider our refugees to be important resources in the Swedish society. The legal platform is an economic association - Ekshärligt i Hagfors - which gathers positive forces and drives the community development forward when it comes to integration and entrepreneurship.

### **This is how you realize your business idea in ArbetsSkaparna:**

- You contact us and tell us about your skills and what you want to do.
- You become a member in our economic association.
- You will be employed by us and can start marketing your services/products with potential customers. We will help you develop your competence as an entrepreneur so that you can start creating your own livelihood. Among other things you may need support concerning entrepreneurship, marketing, language skills and to understand the Swedish culture in our business life.
- You sell your competence to companies, associations and/or private persons.
- When the job is done we will invoice the customer. All administration and money management is handled by us so you can focus on your marketing and doing a good job. As your employer we take the formal responsibility for you and your operation which means, for example, that we will insure you, pay your salary, do the bookkeeping, administer costs and taxes and so on.

ArbetsSkaparna is a unique possibility and a secure platform for you who want to create your own income by selling your services/products. We help and support you in different ways to make everything work out fine, but all the time it is you and only you who have the responsibility to drive and develop your business idea.

*Welcome to us!*
